

PROJECT
DERENNE

PROJECT OVERVIEW
OCTOBER 27TH, 2009

Presented to:

OVERVIEW OF PROJECT DERENNE

Phase I of the project included detailed traffic analysis and public outreach. These two steps will help identify transportation deficiencies as well as document specific project concerns.

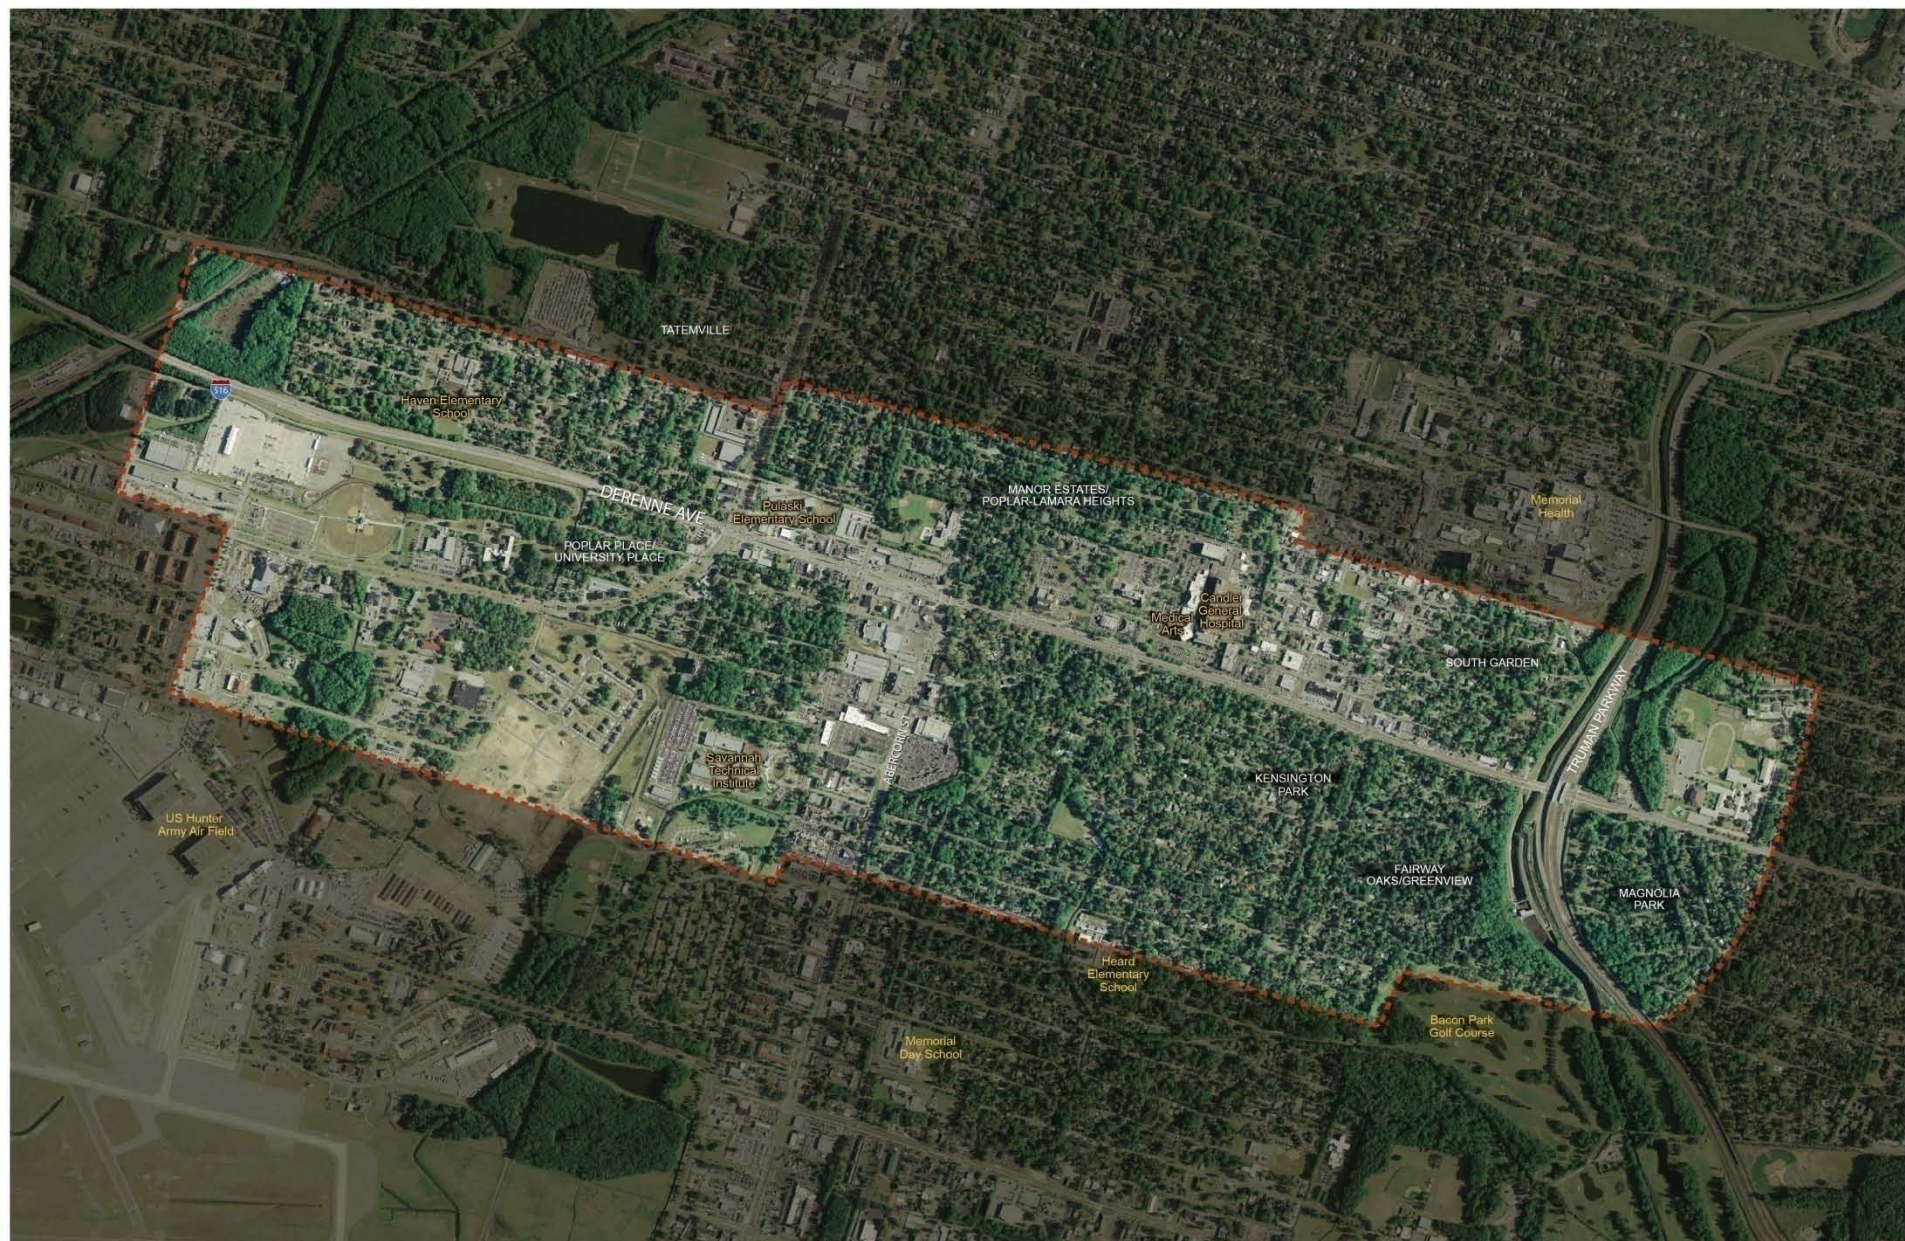

Phase II consist of the collaborative creation of evaluation criteria and the development of transportation and land use alternatives, resulting in the selection of a preferred alternative.

Phase III will include a detailed environmental review of related impacts and preliminary design.

Phase IV will include final design for the selected improvements.

Phase V will include implementation of the selected improvements.

STUDY AREA

PHASE I – PUBLIC OUTREACH

Objectives:

- Neutralize public animosity about DeRenne Avenue widening
- Establish a structured platform for continuous communication
- Gather public input about issues and opportunities
- Establish Guiding Principles

PHASE I – PUBLIC OUTREACH
